## ABOUT ME

Highly motivated Full Stack Developer passionate about innovative, user-friendly web solutions. Experienced in JavaScript, PHP, Java, with expertise in MERN stack, Next.js. Committed to building efficient applications for real world challenges, always adapting to new technologies for high-quality code and exceptional user experiences.

## EXPERIENCE

### Suchana,— Developer/Founder

MAY 2023 - PRESENT

Suchana - the alert system is an online system through which users can post about the risk nearby them and helps to create awareness to the nearby people and the locality.

- Developed “Suchana” platform to provide real-time information about potential hazards to those who need it most.
- Developed “Geo-Suchana” as a sub project - a platform for geospatial data of all across Nepal.
- Integrated Restful APIs to fetch real-time alerts and provide notifications to users within a certain boundary.
